

Assignment - June 28th, 2022

Exploration:

1. Geo Spatial Analysis Use cases
2. Excel User Forms
3. Dependent drop down list

Assignment:

1. Get sales & unit of product sold by region, state, city, month, year, week number of year, product category. Use multiple pivot tables wherever grouping doesn't make sense.
2. Use charts to show numbers in form of visuals for above
3. Create a dependent drop down list to select region, state & name from the data and show total sales for the selection.

Eg : region | state | city | Total sales (first three are drop down list)
